

About NanoBioNexus

NanoBioNexus is the premier nanobiotechnology industry organization dedicated exclusively to facilitating education, partnering, and investment opportunities for nanobiotechnology. NanoBioNexus offers affordable education and networking in an open and congenial environment. NanoBioNexus is proud to head the Educational Core of the San Diego-based Cancer Center of Nanotechnology Excellence (CCNE) funded by the NCI Alliance for Nanotechnology grant.

For more information about NanoBioNexus, its programs, and upcoming events check the website or send an inquiry to admin@nanobionexus.org.

NanoBioNexus is a non-profit, business, networking, and educational forum headquartered in San Diego, CA. with offices in Tucson, AZ and Vancouver, WA.

Nanotechnology for the Life Sciences

NanoBioNexus™

Our Mission

To catalyze collaboration and knowledge exchange in the nanotech field by connecting people, technology, investment and industry. We will accomplish this goal through educational initiatives and forums, seminars and courses and leading market research that provides heightened visibility into scientific breakthroughs in the nanobio field.

Our Services

Forums and Seminar Events

NanoBioNexus hosts a series of programs covering critical and defining issues in the convergent space of nanotech and biotech. An intimate setting is created that promotes open and honest dialogue between presenters and their audience.

Consulting Services

NanoBioNexus offers premier business and strategy expertise to help companies entering the field of nanobiotechnology or that are in the development or commercial pathway that can benefit from a broad range of services and value that only NanoBioNexus delivers.

Other Services

NanoBioNexus offers such services as webcasts, career center and global calendar and a host of outreach activities that aim to benefit our community of interest.

NanoBioNexus aims to demystify the constantly and evolving developments and highlight their implications to society. NanoBioNexus helps to answer the questions "Why is it important to pay attention to nanotechnology?" and "What does this mean to me as a scientist, a business person, an entrepreneur, or an investor?"

"I believe strongly that the emergence of convergent technologies will be very important to the future of San Diego's technology economy. Having an organization like NanoBioNexus take a leadership role in building upon our existing collaborations - with nanobiotechnology as their principal focus - represents an important step in this process. The RTA is pleased to support their efforts."

Tyler Orion, President and CEO
San Diego RTA – RTA@Connect
